Planning

What should I revise
now?

To do:

☒ Plan

☐ Prepare

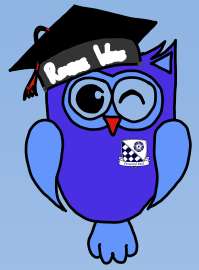

☐ Perform

Task 1

Fill in the 1st page listing the subjects you are studying.

Add your current and target grades (if you know them).

Identifying what to revise

A GCSE contains everything you have learnt for the last 3 years.

This is a lot of information!

You need to be sure that you have covered everything in your revision.

It is much easier to break the content down into smaller chunks to focus on.

Task for session 2

Using the information provided by your teachers add to the topic lists for each of your GCSE subjects.

Everyone does English Language, Maths and Science, so these are already filled in for you.

(If you do combined science you can cross out space in Physics.)
